

QuietCorner™

ACC-GQCO

The QuietCorner accessory is to be installed on either side of a GIRO internal corner, when using the Ambient or Cove Glow optic.

Mechanical Details:

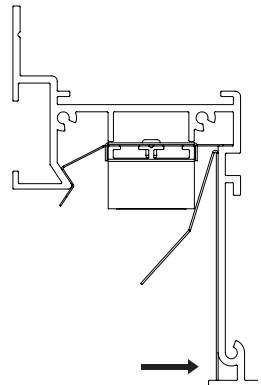

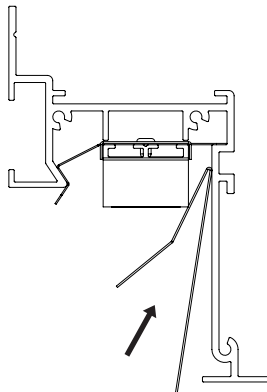

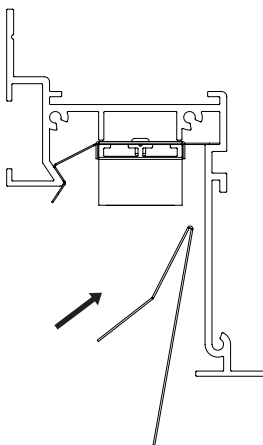

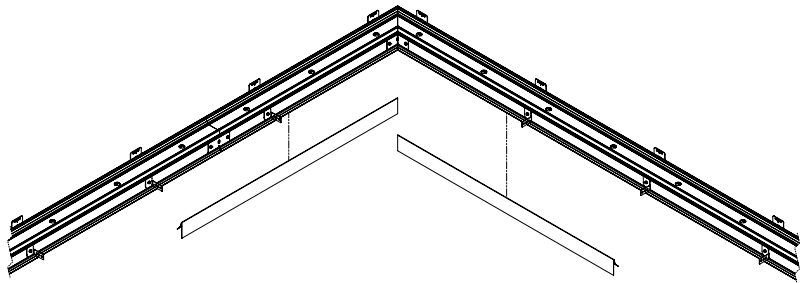

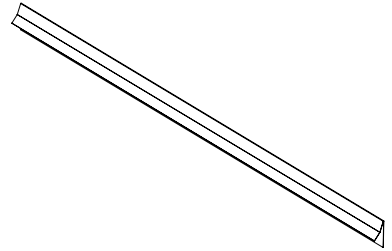

40" Length

Aluminum with white finish

Installation:

After installing the GIRO light modules, snap the QuietCorner accessory into the internal corners of the housing (see detailed images below).

Note: For run lengths shorter than 40", the QuietCorner baffle can be field cut as needed with metal snips.

Note: To remove the QuietCorner baffle, it is recommended to remove the light module first.
